TEMPLATE NOTES

Set Project Parameters

- 1) Go to Project -> Project Options -> Parameters
- 2) Set Company, Project and VersionRevision

Mark Not Fitted Components as
NF

Net Class Example

Differential signal example

Schematic Status Explanation

- DRAFT - Very early stage of schematic, ignore details.
- PRELIMINARY - Close to final schematic.
- CHECKED - There should not be any mistakes. Tell the engineer if you find one.
- RELEASED - A board with this schematic has been sent to production.

Rev.	Description	Date	Name							

DESIGN NOTE:
SET AIN0 as IOUT in order to provide reference voltage for RTD1
SET AIN1 as IOUT in order to provide reference voltage for RTD2

XP5 calibrated to 10V according to datasheet. We got two options for XP5 supply.
SET AIN2 as IOUT in order to provide reference voltage for XP5
If you want to supply sensor with 3V3 you have to dont fit R23 and R20 also fit r34 and r32
You dont need to set AIN3 as a IOUT while using 3V3 option.
